■ Print-on-Demand

1

Your store connects

Amazon · Shopify · TikTok Shop

2

Order arrives via API

automatically, every day

3

We produce it

after the order – no inventory

4

We ship it

to your customer or fulfillment center

From **1 unit**.

No stock. No forecast.

No capital tied up.

■ Two factories – one system

Every order is produced at the site that delivers to your customer faster: an order from Japan is printed in Guangzhou, an order from Canada – in California.

FACTORY · NORTH AMERICA

Oceanside, California

Our own factory in the US: UV lines, the design studio, HQ – fast sampling, short runs and quick delivery across North America.

SKUs managed
by our platform

Wherever it's made, our partners use the whole infrastructure and sell on every marketplace in the world.

- **You own the traffic.**
We own the product infrastructure.

ON OUR SIDE

- **Store connection and daily order flow via API**
- **Your designs adapted to every device model**
500+ models, new ones added as they launch
- **Listing content for every SKU**
3D renders, feature cards, lifestyle – ready to upload
- **Catalogue publishing and synchronisation**
- **Production after each order, quality check, packaging**
- **Shipping to your customer or fulfillment center**

ON YOUR SIDE

- **Brand and designs**
your artwork – or we help create it
- **Traffic and advertising**
- **Your store, customers and reviews**

We keep expanding your range: new device models, new categories – you don't source product, find a manufacturer or shoot photos again.

■ Your listing content – produced, not photographed

A complete gallery for every SKU.

Rendered in 3D, not shot – new models and colours in days, without a studio. Delivered ready to upload.

Shown: phone case set. Every category ships with its own gallery.

Content is part of the print-on-demand service – not a separate project and not an agency invoice.
